Please follow the below file structure when sending your images:

##### Folder Structure

##### Zipped File

## Web Styling: Colour

### Creating the perfect colour scheme for your website

Blue, bold or serious? We recommend using **Huemints** AI-powered colour palette generator to create a balanced colour scheme that works for your site. Lock in key colours or let them generate a colour palette from scratch. (Just remember that fewer colours are more effective in web design).

Alternatively, you can supply a reference link to a website or upload an image from which we can source colours.
